MONOLITHIC CRYSTAL FILTER

Koyo's monolithic crystal filters (M.C.F.) are very high reliability and small size. They are resistance weld seal type. For use as mobil's wireless communication, cordless phone and other many kinds of electronic communication equipments.

光陽のM.C.F.は、小型高信頼性を誇っています、抵抗溶接型レゾネーターで構成されています。これらは移動無線通信、コードレス・フォン、その他の電子機器、通信機器に使われています。

V型宝石軸受

宝石軸受の中で電気計器用としてもっとも数多く使用されており、断面がアルファベットのV字型をしているので、一般にV字型軸受と呼ばれております。

電気指示計器・工業用計器・カメラ用露出計・時計簿の精密機器はますます高い精度と、より永い耐久性を要求されております。これらの心臓部に組込まれる宝石軸受は特に優れた加工技術と、ゆきとどいた品質管理のもとに製作されなければなりません。こうした条件に基づいて当社は全く独創的な加工方法による量産化を完成しております。また日本碍子(株)と提携して、従来のサファイヤ・ルビー・メノウ等の宝石軸受に次いでミラクロン軸受を量産し、量産計器用として御好評を得ております。

JEWEL BEARINGS

D : Diameter of jewel 直径
H : Height of jewel 高さ
A : Angle of V shape hole 角度
P : Depth of V shape hole 深さ
R : Center radius of curvature 曲率半径
or V shape hole bottom

Among the various type of jewel bearing, this type is mostly used for electric meters and is called as "V-TYPE" bearing because it's cross section has V-letter shape.

For precision gauges or instruments such as electric meter, industrial gauges, exposure meters of camera and watches, the bearings are required for long life and durability. The jewel bearings which are assembled in such very important part have to be processed by surpassing technics together with complete quality control in manufacturing processes. We have developed the original massproduction system meeting above requirement of jewel bearing. Moreover, as next material of sapphire, ruby and agate, we developed quite a new material for jewel bearing, "MIRACLON", and we succeeded to put this material into massproduction of bearing, and now getting high reputation from our customers who produce meters in mass scale.
